

Pig Farm Air Inlet

Deba Brothers® is a leading China Pig Farm Air Inlet manufacturers, suppliers and exporter. Made of ABS engineering plastics processing and that side installation is easy and flexible, the volume of the chosen at random, length size can be arbitrary custom.

Product Description

Deba Brothers® is a professional China Pig Farm Air Inlet manufacturers and suppliers. Deba Brothers® is a technical pig farm air inlet producer and provider. Pig farm air inlet side mode is activated when outside temperatures are low. Because fresh air intake is through multiple evenly-spaced inlets, ambient temperature throughout the barn is similar. With low outside temperatures and in pig farm air inlet side mode, the low air flow rate can be regulated very precisely to maintain even temperatures in the entire barn.

Pig Farm Air Inlet Specifications

Dimension	645mm*305mm*105mm
	600mm*325mm*160mm
	690mm*300mm
Material	ABS engineering plastic

Pig Farm Air Inlet Advantage

1. Using ABS engineering plastic injection molding processing, and not deform under high and low temperature.
2. Raw material is added with anti-ultraviolet material, which is strong aging resistance, service life is longer hermetically sealed, open flexible, and tuyere is equipped with anti-bird netting.
3. Double pulley guide damper design, effectively reduce the resistance and enhance the service life of the rope.
4. Firstly use of pulley device in inlet, it can reduce friction, enhance the use of rope life.
5. Optional installation of diversion plate, effectively control of the direction of airflow.
